

IN THE CLAIMS:

1. (Original Claim) A human sleeping chamber comprising:
  - a. An outer casing, having an interior and an exterior;
  - b. An inner casing, having an interior and an exterior and located within the interior of the outer casing, defining a space between the exterior of the inner and interior of the outer casings;
  - c. thermal insulation, located in the space between the inner and outer casings;
  - d. a ventilation system capable of distributing air from outside the casings into the inside casing, said ventilation system having a control unit located within the inner casing;
  - e. a thermal control system operably connected to the ventilation system, said system further having a control unit located within the inner casing;
  - f. a power system, operably coupled to the ventilation and thermal control systems
  - g. a door, lockable from inside the inner casing, ingress and egress within the inner casing; and
  - h. a mattress located on a floor inside the inner casing.
2. (Original Claim) The human sleeping chamber of claim 1, further comprising an exterior surveillance system, said exterior surveillance system further comprising a camera having a view outside the outer casing, a monitor, operably connected to the camera, and a control system operably connected to the camera and the monitor, said surveillance system likewise operably connected to the power system.

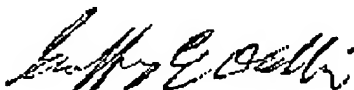

3. (Original Claim) The human sleeping chamber of claim 1, further comprising a lighting system, operable from within the inner casing and operably connected to the power system.
4. (Original Claim) The human sleeping chamber of claim 1, further comprising an entertainment system, said entertainment system further comprising at least one component selected from the set of components consisting of a television set, a computer, a radio, and a video game system.
5. (Original Claim) The human sleeping chamber of claim 1, further comprising a communications system, said communications system further comprising at least one component selected from the set of components consisting of a telephone and an intercom.
6. (Original Claim) The human sleeping chamber of claim 1, further comprising a control panel, mounted on the interior of the inner casing, said control panel featuring controls for any of the chamber's user operable systems.
7. (Original Claim) The human sleeping chamber of claim 1, further comprising a water inlet.
8. (Original Claim) The human sleeping chamber of claim 1, further comprising a vending system, operably connected to the door, allowing users to purchase access to the chamber.
9. (Original Claim) The human sleeping chamber of claim 1, further comprising a secondary door, lockable from the interior of the inner casing.

10. (Original Claim) The human sleeping chamber of claim 1, the outer casing being adapted to fit inside a motor vehicle cargo area.
11. (Original Claim) The human sleeping chamber of claim 1, further comprising a solar energy collector, operably connected to the power system.
12. (Original Claim) The human sleeping chamber of claim 1, further comprising a solar energy collector, operably connected to the thermal control system.
13. (Original Claim) The human sleeping chamber of claim 1, the powers system further comprising at least one fuel cell.
14. (New Claim) The human sleeping chamber of claim 10, the motor vehicle cargo area being a tractor sleeping berth.

Applicant submits that Claims 1-14 are now clearly allowable over the prior art and Applicant respectfully requests allowance of these Claims and the case passed for issue. If Examiner believes that a telephonic conference would facilitate the examination of this Application, or would resolve questions Examiner may have, please do not hesitate to call Applicant's Attorney at the contact information below.

Respectfully Submitted,

Date: February 9, 2005
